Lectures on Lie groups and geometry S. K. Donaldson March 25, 2011 Abstract ... A Lie group is a group with G which is a differentiable manifold and such ... A right action of a Lie group on a manifold M is a smooth map $M \times G \rightarrow M$ written $(m, g) \rightarrow m \cdot g$ such that $m \cdot (gh) = (m \cdot g) \cdot h$. Similarly for a left action.
